GREEN SUKABUMI STONE

Natural stone for distinctive pools

Green Sukabumi, also known as Pedra Hijau, is an Indonesian natural stone valued for its green tones and natural variation. Its appearance deepens when wet, creating an attractive finish for pools, spas and water features.

Applications and finishes

Suitable applications include pool interiors, wall cladding and decorative water features, subject to project specifications. Available finishes include sawn-cut, honed and split-face. Select the finish to suit the intended use.

Sizes and pool coping

Standard tiles include 10 x 10, 10 x 20, 10 x 30, 15 x 15, 15 x 30 and 20 x 20 cm at 1 cm thickness. Additional rectangles include 10 x 40 x 2 and 10 x 60 x 2 cm. Larger formats: 30 x 30 x 2 cm and 30 x 60 x 1.5 or 2 cm. Pool coping: 30 x 60 x 2 cm. Confirm availability when ordering.

Product and installation notes

Natural colour, texture and veining vary between pieces and batches. Approve representative samples before ordering. Pool installations require suitable waterproofing, adhesive, grout and routine water maintenance. Stone tiles do not replace filtration or disinfection.
